CONCEPCION, April 29, 1954

W. K. Kellogg Foundation
BATTLE CREEK, Michigan

Dear Sires:

At the time of the visit to Concepción, in 1953, of Dr. Benjamin G. Horning and in 1954, of Dr. Kinde, Dr. Fructuoso Biel, former fellow in Internal Medicine of the W. K. Kellogg Foundation and Dr. Bruno Günther, former fellow in Physiology, requested from them funds from the Foundation to purchase some pieces of equipment for their laboratories.

As a matter of fact, half the equipment of the new laboratory of Physiology was a gift from your Foundation and the additional instruments Dr. Günther asks for now are of great need.

Dr. Fructuoso Biel is developing a new Department of Clinical Investigation in which he and other personnel of the Medical, Surgical and Pediatric Services can do some interesting clinical research.

In the name of our Faculty I take the liberty of requesting this items of equipment from the W.K. Kellogg Foundation giving you all kind of assurances that it is going to be of great help for our research and teaching activities.

Sincerely yours,

Dr. Ignacio González G.
DEAN
FACULTY OF MEDICINE
